

## A scientist, not a career politician

My career spans more than 25 years across academia and industry — including work for Queen's University and ESG Solutions — both based in Kingston.

### I AM FIGHTING FOR:

- Rigorous budget scrutiny and lower property tax
- Robust job creation
- Kingston as a tech and industrial hub
- Lower food cost, food grown at home and tax refunds
- Affordable housing
- Cleaner streets, better roads & clear signage
- Better public services, public health & infrastructure
- A beautiful Kingston
- A long term vision for a safe and vigilant Kingston that protects us and our children.
- Better standard of living
- Gender equality
- Upholding Canadian values
- Diversity & Integration, but not hostile diversity

*My win is your win.*
